

## MINI COMBICON Double-Level Headers for Through Hole Reflow Processes, MCDN 1,5/... 3.5 mm Pitch

---

The MCDN(V) 1,5/... double-level headers feature minimum space requirement on the PCB, and at the same time, high contact density. It goes without saying that the headers are designed as reflow-capable components for the SMT process. The headers are available with two different pin lengths, horizontal or vertical plug-in direction, and with 2 to 20 positions. There is also a version with lateral self-locking flanges for engaging the connector to the header. LCP (Liquid Crystal Polymer), a material that has a high thermal stability in the reflow solder process, is used as insulating material. Peak temperatures above 260 °C are quite possible during the solder process.

### COMBICON Select

The COMBICON search engine with CAD downloading

COMBICON Select – the printed circuit board connection software supports your workflow from the PCB and housing layout to the ordering process with:

- Systematic and fast selection of products
- Universal Internet aided engineering with extensive CAD downloading
- Easy-to-use e-shopping functions.

# MCDNV 1,5/...-G1-3,5 RNP14 THR 3.5 mm Pitch

**Note:**

COMBICON plug connectors may only be actuated in the no-load condition. If smaller loads need to be switched for operational reasons, experimental values are available on request.

Description	No. of pos.	Dim. a [mm]	Type	Order No.	Pcs./Pkt.
<b>Double-level headers, plug-in direction vertical to the printed circuit board, 3.5 mm pitch, with engagement latch, pin length: 1.4 mm, color: black,</b>	2	3.5	MCDNV 1,5/2-G1-3,5 RNP14THR	19 52 50 0	50

(1) **Coding profile**, is inserted into the groove on the plug after the reflow/assembly process, insulating material: red

(2) **Marker card**, with 14 pcs. 10-section marker strips, white, self-adhesive, for 140 terminal blocks
