## 341900F00000G

Low profile copper heat sink for PCI and AGP chip sets

When space is at a premium, Aavid's Thin-fin heat sinks reduce package case temperature by as much as 20°C. These flexible, copper spreaders attach to the electronic package using pre-applied adhesive, providing an off-the-shelf solution for PCI and AGP chip sets. A laminated dielectric coating prevents shorting, making the Thin Fin ideal for BGA devices and multimedia applications.

RoHS:

### Thermal Performance

(based on a heatsink temperature rise of 75°C above ambient)  
based on fully ducted airflow entering at 1.0 m/s (197 LFM).

**Thermal Curve:**

Aavid will lead the electronics thermal management industry worldwide. We will be the first company customers call to enable their thermal designs anywhere in the world. We will respond with extraordinary speed and will provide them with timely and cost-effective solutions because we understand their needs, their industry, and their culture. 2012 Aavid Thermalloy, LLC
