PRODUCTION CHANGE STATEMENT

August 22nd 2022

Subject: Addition of Manufacturing Site in China for Selected Solid State Relay Products

Dear Valued customer:

In an effort to ensure business continuity and to serve our customers better we have updated our SSR production lines at our Baoying, China facility to allow this site to manufacture some of the product families which are currently being manufactured only at our Tijuana, Mexico facility, such as our popular Gen 4 panel mount SSRs, our CX series PCB mount SSRs and our Evolution Dual panel mount SSRs, among other.

We have been producing hockey puck SSRs in China for over 6 years so our production team there already has experience with the manufacturing of solid state relay products.

All the products that will be manufactured at the Baoying site will be constructed in accordance to the manufacturing specifications that are currently in place at the Tijuana site, tested under the same specifications and they will be inspected under the same quality standards, so there will be no differences in the mechanical or electrical specifications between the same product manufactured on any of the 2 sites, other than markings related to country of origin and date codes.

The following products are ready to be produced at our Baoying facility:
