

**June 16th, 2021**

**Subject: Halogen Free Connectors**

**Bel Fuse MagJack® Connector Customers,**

On June 4<sup>th</sup>, 2021, Bel issued a notice that we may have to substitute non-halogen free material for these MagJack part numbers due to supply chain disruptions.

We are pleased to announce that our purchasing group has secured enough supply of the DuPont Halogen Free HTN plastic to meet our planned production schedules, so this substitution will NOT occur.

Thank you to the customers that worked through this issue with us. This has been a turbulent year to say the least and we greatly appreciate your consideration and flexibility.

**Sincerely,**

**Your Bel / TRP ICM Team**

**Included Part Numbers:**
