

PROCESS CHANGE NOTIFICATION

Date Issued: April 17, 2009

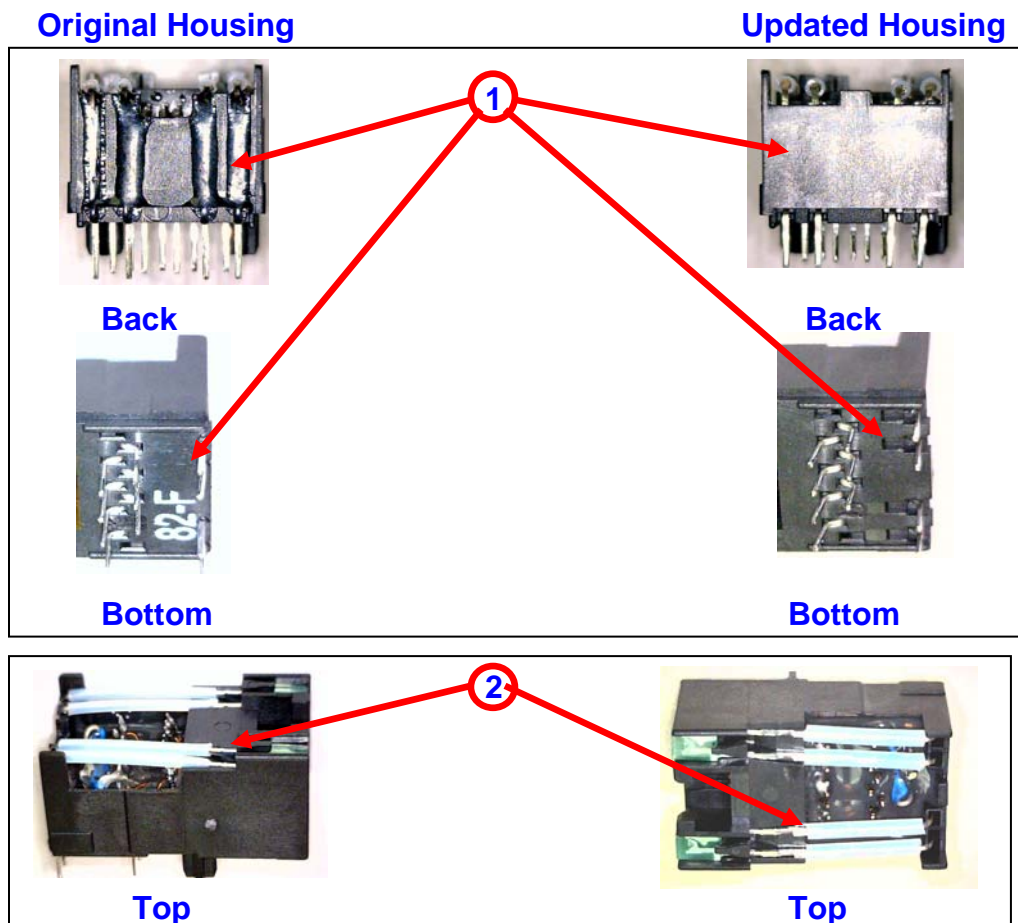

Product Identification: SI-5, SI-8 series

Unique Tracking Number: PCN NO, PC208672

Reason(s) for Change: In an effort to continually improve our product, Bel is pleased to announce that the design of these Integrated Connector Product series is being updated.

1. We are removing epoxy operation and placing plastic walls between the LED leads to better insulate them from the shield and magnetics.
2. We are modifying the length of the insulating tubing so it is secured between the two walls of the housing to ease assembly.

For details see below:

This change does not affect RoHS compliant status of the connectors. No other changes to the above series are being implemented at this time. This change will not affect “form, fit, or function”, nor does it affect dimensions or electrical parameters of the part.
