

## **MINI-MELF-SMD**

**ZMM2,7  
thru  
ZMM51**

## 0.5 Watt Zener Diodes

## Use Advantages

This family is equivalent to the European PRO Electron types.

The specifications reflect similar low zener test currents over voltage ranges.

For use in clipping and stabilizing circuits, where real protection is needed.

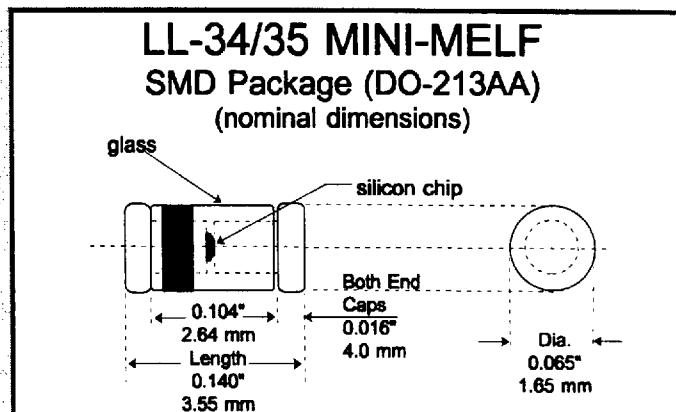

Able to directly replace SMA and SOD-323 plastic packages on boards without redesign.

**Compatible with all major automatic assembly equipment.**

May be used on ceramic boards along with high temperature IR solder reflow.

## Features
