Change to the Minimum Ordering Quantity for Select Precision Potentiometers & Rotary Position Sensors

Effective November 27, 2015 - In response to a continual increase in material costs, Bourns Sensors & Controls Product Line is increasing the Minimum Order Quantities (MOQs) of select precision potentiometers and rotary position sensors. Increasing the MOQs on the models listed below from 25 pieces to 50 pieces will allow us to maintain economies of scale in production to help offset the increase in cost of materials. There is no change to the Multiple Ordering Quantity.
