Bourns® Model 39 Series Single-Turn Panel Control with Switch Option Modified Contact Spring and Rotor Design

In line with our commitment to continuous improvement, Bourns Sensors and Controls announces an improvement to the [Model 39 Series Panel Control with Switch Option](#). The improvement entails a redesigned contact spring and rotor.

- The improved contact spring offers more robust contact fingers.

Before

After

- The modified rotor will help improve rotor stability on the housing during rotation. The diameter of the rotor is changing from $.051 \pm .001$ " to $.060 \pm .002$ ".

There are no changes to the form, fit, or function of the panel control. Samples are available upon request.

Implementation dates are as follows:

Last time buy date: November 30, 2013

First date code using above changes: December 20, 2013

Date that manufacturing of existing products will cease: December 16, 2013

Date that deliveries of modified products will begin: January 6, 2014

If you have any questions or need additional information, please feel free to contact [Customer Service/Inside Sales](#).
