Camdenboss CNMB-4-KIT-CON DIN rail casing 90 x 71.0 x 58 Polycarbonate (PC) 1 pc(s)

This innovative rail-housing program with different widths has applications in control and automation, eg for electronic modules, amplifiers, or as a control and regulator housing for time control, sensors, relays, signal distribution and other applications. The housings are assembled only by a simple and time saving latching (no screws). They allow both an attachment to a DIN-rail with quick fixing clips or a direct wall mounting. An optional adapter (CDR adapter) for the G-rail is available. All types offer the ultimate ease of installation in the assembly and its attachment. Guides for the vertical and horizontal PCB mounting and fixing dome for vertical mounting are available for all housing types.

Delivery

- The case comes complete with top shell, housing bottom, housing cover, 2 terminal covers snaps and clips.

Optional accessories

Item no.: 531449

Camdenboss CDR-Adapter Adapter-CAMDEN Compatible with (details) G-Rails
