

**PCN826:** Carling Brownsville New Customer Pick-up location

**Issue Date:** May 16, 2024

Dear Valued Customer,

This notice is to update you on the upcoming transfer for all shipping operations contained within the Carling Brownsville site.

**Description of the Change:**

All shipping operations have begun through a new Brownsville Third-Party Logistics (3PL) facility at the below address:

Carling Technologies Inc. c/o DSV Air & Sea Inc.  
1385 Cheers St Ste B  
Brownsville, TX 78521

To support this upcoming change, we will require a Bill of Landing (BOL) response within the same day. Any delays in sending the BOL will delay the pick-up date of the freight. We do not send shipments across the border until we have the BOL.

**Reason for The Change:**

Relocation of these services in order to accommodate the move of our Carling Brownsville operations to our Carling Matehuala, MX facility.

**Effective Date of the Change:**

This transition has begun with certain shipments and will continue until our current location closes by the end of the year.

**What You Need to Do:**

- Our shipping clerks will continue sending the BOL as you have historically received them. The only change is a required same day response with confirmation needed by 2:30pm for same day pick up. Delaying confirmation will create a delay of at least 24 hours. Delays on Thursday or Friday will move shipments to the next week.
- There will be no change in fit/form/function or part numbers with this transfer.

If you have any questions, please contact your Customer Service or Inside Sales Representative. We appreciate your business and our continued partnership.

Sincerely,

Luisa Cuevas  
Associate Product Manager, Product Management  
Littelfuse Commercial Vehicle Products
