

July 13, 2021

To Our Valued Cornell Dubilier Distribution Partners,

The following is an update on Surface Mount Lytic parts manufactured in Malaysia.

During the months of June and July, the Malaysian government has mandated business lock-downs due to COVID concerns. The EMCO (enhanced movement control order) required that all premises be closed except for essential services, such as food and medical suppliers. Currently our factory has been awarded essential status and is operating at a 60% workforce capacity. This mandate is set to expire at the end of this week. We are unsure if the mandate will be extended or be lifted.

Below are the Surface Mount Lytics that are manufactured in Malaysia and affected by this government mandated lock-down.

AVS
AFC
AFK (*except Suffix V)
AHA

Previously confirmed delivery dates for parts that are not yet in transit from the factory may be delayed.

Please know that we are doing our very best to expedite production to ensure parts are shipped as soon as possible. We appreciate your understanding and patience during this process.

Thank you,

Sincerely,

Ann Larson
