

April 9, 2014

Dear Distributor,

CDE is currently gearing up for automated production of snap-in capacitors. In the process we have found it necessary to standardize on raw material components and minimum order quantities. Please be advised that as of May 9, 2014, the minimum order quantities for all non-stocked items will be set at 1000 pcs per buy. If you have any questions, please be in touch with your CDE sales representative.

Sincerely,

Jim Navarro
