1. Purpose

C&K Components, a design and manufacturing company is constantly striving to continuously improvement in the manufacturing and production of our parts in order to deliver the best in class switches into the market. Our goal is to serve our customers with an ever-increasing level of value while ensuring customer satisfaction on our product is fully guaranteed.

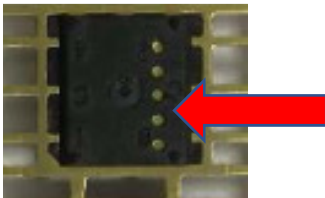

The PCN introduces the change on the Coded Rotary Housing, which is presently used in the CD Series.

2. Overview

At present, the housing can be easily identified by the 3 small round shape holes as shown vertically:

The new housing will be changed from 3 small round shape holes to 5 small round shape holes:

The change:

1. No impact the performance of the switch itself
2. No change in the dimension of the switch
3. Related to manufacturing process improvement

3. Impact of Change and Qualification

3.1 Impact of Change

An important note is that there is no impact on the quality of the actual CD Series switch at all with this addition of round shape holes

End user who buys these CD switch may notice that the additional 2 holes added onto it.

3.2 Qualification

The switch has been fully qualified to ensure a high consistent quality and performance level.

4. Part numbers affected

The following table defined the active part numbers impacted by this PCN:
