1. Purpose

C&K, as a design and manufacturing company for tactile switches, is constantly looking to improve the manufacturing means and processes in order to continue serving its customers with the highest performance level.

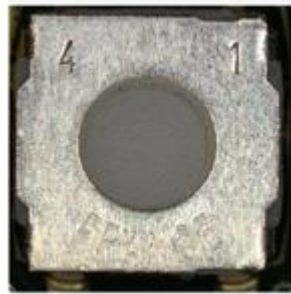

In order to improve product traceability, there is a change of the product marking on one of our pieces of assembly equipment. In addition to the existing product marking, there will be the date code and internal information.

2. Overview

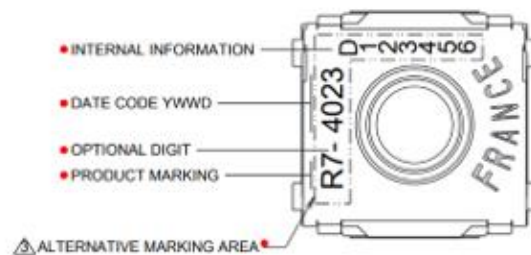

As the switches will be manufactured on multiple pieces of equipment, there could be two different markings.

Visual change:

Current stamped marking

New laser marking
