Document subject to change without prior notice

Dear Valued Customer

Please be advised that we are in the process of transferring the Snap Acting series switches production lines from our facility in Costa Rica to Huizhou China. Once this change is in effect, we will no longer provide VDE certification for the LC and UA product lines. We will be qualifying these same Snap Acting product lines to EN61058-1 which replaces VDE and expect to be certified after the transition in the fourth quarter of 2012. In addition we have replaced the CSA Certification with UL Canada certification. A list of all effected part numbers and series are attached for your reference.

The transfer affects all snap acting switches that are manufactured in our Costa Rica facility, though not all product lines are affected by the VDE to EN61-58-1 change. Production in Costa will stop on or about October 1st 2012 and start back up in mid November 2012 in our Huizhou facility.

We will accept order cancellations for those customers who cannot accept the part without VDE certification. In general this change only affects those customers that ship product into the European market and require VDE certification. The EN61058-1 standard has become the industry standard in Europe Should you have any questions or require further information please feel free to contact your respective customer service person or one of our product specialists at 617-969-3700 extension 8659.

We regret any inconvenience this may cause during the transition period.

Best Regards,

Vincent Acampora
