¹ Trace quantities of SVHCs may be present but are below the reporting threshold.

² Lead Monoxide

EU Decision number ED/169/2012 dated 19 December 2012 added Lead Monoxide (EC number 215-267-0, CAS number 1317-36-8) to REACH Annex XIV as a substance of very high concern (SVHC). Certain Diodes Incorporated products contain glass with lead (Lead Monoxide) as a substance exceeding 0.1% by weight is present within the die glass passivation and/or glass encapsulation.

Under the REACH regulation, glass is classified as a UVCB substance (a substance of unknown or variable composition, complex reaction products or biological material) containing such elements as silicon, calcium, sodium, potassium, magnesium bonded together by oxygen; these elements are bonded into a non-crystalline molecular structure with completely different properties to the starting raw materials. Glass is not a mixture of compounds such as SiO₂, Na₂O, CaO, B₂O₃, PbO, etc. and since glass itself is not considered hazardous and is not included in the SVHC list, there are no obligations to communicate information according to Article 33 of the REACH regulation concerning SVHC in articles and related to lead monoxide in glass.

GADSL: (Global Automotive Declarable Substance List) Update 1 August 2014

Diodes Incorporated's products may contain permutations of the following substances:

Arsenic:	Is used as a dopant in the "chip" or "die".
Antimony Trioxide:	Is used as a part of the flame retardant system in non-green product.
Copper*:	Some products use copper in the leadframe alloy, some others have a copper-plated Alloy 42 leadframe. Copper is increasingly being used internally in product to form connections between the die and the leadframe.
Cobalt*:	Some products contain Cobalt in the Alloy 42 leadframe alloy.
Nickel:	Some products contain Nickel in the leadframe alloy or leadframe under plating; some have nickel in the die metallisation. All usage is wholly contained within the device and does not come into contact with the skin during normal operation..
Lead:	Some products have a high temperature solder die attach >85% lead, some have lead in the die passivation or the glass encapsulation; others have lead in the copper leadframe alloy. All of these applications are exempted from RoHS.
Silica, crystalline	CAS 14808-60-7 Some products contain this substance in the encapsulation (molding compound).

*These substances are not used in GADSL-listed applications, but are included for completeness.

Rare Earth Metals:

Our products do not contain: Scandium, Yttrium, Lanthanum, Cerium, Praseodymium, Neodymium, Promethium, Samarium, Europium, Gadolinium, Terbium, Dysprosium, Holmium, Erbium, Thulium, Ytterbium, Ruthenium.

Certain Diodes Inc. products contain lead and/or nickel. These are wholly contained within the devices. All products not defined as "green" contain Antimony Trioxide.

“Green” or “Halogen-free” products are defined as:

1. RoHS and REACH Compliant
2. Bromine <900ppm, Chlorine <900ppm, Bromine+Chlorine <1500ppm, Antimony Compounds <1000ppm.

JEDEC/ECA Halogen-Free Standard JS709A Diodes Incorporated “Green” / “Halogen-free” product meet these requirements.

Montreal Protocol Diodes Incorporated products do not contain any of the listed substances.

Stockholm Convention (POP Regulation) (EC Regulation 850/2004) Diodes Incorporated products do not contain any of the listed substances.

* **The following applicable exemptions are currently outlined in EVL II and RoHS II:**

- 7a Lead in high melting temperature type solders (i.e. lead- based alloys containing 85 % by weight or more lead) (Some Diodes Inc. products use this type of solder internally for die attach purposes)
- 7c-I Electrical and electronic components containing lead in a glass or ceramic other than dielectric ceramic in capacitors, e.g. piezoelectronic devices, or in a glass or ceramic matrix compound.
Some Diodes Inc. products use glass passivation at the die level and/or glass packages which contain Lead

RoHS exemptions are to be reviewed and may be subject to change at least every four years. Renewal of Exemptions is expected where no viable alternative material is available.

IEC 62474 (Replaces JIG 101)

Validity: 24 September 2014 update.

Certain Diodes Inc. products contain lead and use the exemptions stated above.
