# 1. SCOPE

1.1 <u>Scope</u>. This drawing describes device requirements for MIL-STD-883 compliant, non-JAN class level B microcircuits in accordance with MIL-PRF-38535, appendix A.

1.2 Part or Identifying Number (PIN). The complete PIN shall be as shown in the following example:

1.2.1 <u>Device type(s)</u>. The device type(s) shall identify the circuit function as follows:

Device type	Generic number	<u>Circuit</u>	Access time
01	27C64-25	8K x 8-bit CMOS UVEPROM	250 ns
02	27C64-35	8K x 8-bit CMOS UVEPROM	350 ns
03	27C64-20	8K x 8-bit CMOS UVEPROM	200 ns
04	27C64-90	8K x 8-bit CMOS UVEPROM	90 ns
05	27C64-12	8K x 8-bit CMOS UVEPROM	120 ns
06	27C64-15	8K x 8-bit CMOS UVEPROM	150 ns
07	57C64-70	8K x 8-bit CMOS UVEPROM	70 ns

1.2.2 Case outline(s). The case outline(s) shall be as designated in MIL-STD-1835, and as follows:

Outline letter	Descriptive designator	<u>Terminals</u>	Package style 1/
Y	GDIP1-T28 or CDIP2-T28	28	dual-in-line package
Z	CQCC1-N32	32	rectangular chip carrier package

1.2.3 Lead finish. The lead finish is as specified in MIL-PRF-38535, appendix A.

### 1.3 Absolute maximum ratings.

Storage temperature range All input or output voltages with respect	-65°C to +150°C
to ground	-2.0 V dc to +7.0 V dc 2/
Voltage on A <sub>9</sub> with respect to ground V <sub>PP</sub> supply voltage with respect to ground	-2.0 V dc to +13.5 V dc 2/
during programming	-2.0 V dc to +14.0 V dc 2/
Maximum power dissipation (P <sub>D</sub> ): <u>3</u> / Device types 01 and 03	170 mW
Device type 02	
Device types 04, 05, 06, and 07	550 mW
Lead temperature (soldering, 10 seconds)	+300°C
Thermal resistance, junction-to-case ( $\Theta_{JC}$ ):	
Cases Y and Z	See MIL-STD-1835
Junction temperature (T <sub>J</sub> )	+150°C
Data Retention	10 years, minimum

1/ Lid shall be transparent to permit ultraviolet light erasure.

2/ Minimum dc input voltage is -0.5 V dc, during transitions, the inputs may undershoot to -2.0 V dc for periods less than 20 ns.

3/ Must withstand the added P<sub>D</sub> due to short-circuit test; e.g., I<sub>OS</sub>.

STANDARD MICROCIRCUIT DRAWING	SIZE A		85102
DLA LAND AND MARITIME		REVISION LEVEL	SHEET
COLUMBUS, OHIO 43218-3990		G	2

#### 1.4 Recommended operating conditions.

Case operating temperature range (T <sub>c</sub> )	-55°C to +125°C
Input low voltage +10% supply (V <sub>IL</sub> )	-0.5 V dc to +0.8 V dc
Input high voltage <u>+</u> 10% supply (V <sub>IH</sub> )	2.0 V dc to V <sub>CC</sub> +0.5 V dc
Supply voltage range (Vcc)	4.5 V dc to 5.5 V dc

### 2. APPLICABLE DOCUMENTS

2.1 <u>Government specification, standards, and handbooks</u>. The following specification, standards, and handbooks form a part of this drawing to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

DEPARTMENT OF DEFENSE SPECIFICATION

MIL-PRF-38535 - Integrated Circuits, Manufacturing, General Specification for.

DEPARTMENT OF DEFENSE STANDARDS

MIL-STD-883 -	Test Method Standard Microcircuits.
MIL-STD-1835 -	Interface Standard Electronic Component Case Outlines.

DEPARTMENT OF DEFENSE HANDBOOKS

MIL-HDBK-103 - List of Standard Microcircuit Drawings. MIL-HDBK-780 - Standard Microcircuit Drawings.

(Copies of these documents are available online at <u>http://quicksearch.dla.mil/</u> or from the Standardization Document Order Desk, 700 Robbins Avenue, Building 4D, Philadelphia, PA 19111-5094.)

2.2 <u>Order of precedence</u>. In the event of a conflict between the text of this drawing and the references cited herein, the text of this drawing takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

### 3. REQUIREMENTS

3.1 <u>Item requirements</u> The individual item requirements shall be in accordance with MIL-PRF-38535, appendix A for non-JAN class level B devices and as specified herein. Product built to this drawing that is produced by a Qualified Manufacturer Listing (QML) certified and qualified manufacturer or a manufacturer who has been granted transitional certification to MIL-PRF-38535 may be processed as QML product in accordance with the manufacturer's approved program plan and qualifying activity approval in accordance with MIL-PRF-38535. This QML flow as documented in the Quality Management (QM) plan may make modifications to the requirements herein. These modifications shall not affect the PIN as described herein. A "Q" or "QML" certification mark in accordance with MIL-PRF-38535 is required to identify when the QML flow option is used. This drawing has been modified to allow the manufacturer to use the alternate die/fabrication requirements of paragraph A.3.2.2 of MIL-PRF-38535 or alternative approved by the Qualifying Activity.

3.2 <u>Design, construction, and physical dimensions</u>. The design, construction, and physical dimensions shall be as specified in MIL-PRF-38535, appendix A and herein.

3.2.1 <u>Terminal connections</u>. The terminal connections shall be as specified on figure 1.

3.2.2 <u>Truth tables</u>. The truth table shall be as specified on figure 2.

3.2.2.1 Programmed devices. The requirements for supplying programmed devices are not a part of this drawing.

3.2.3 <u>Case outlines</u>. The case outlines shall be in accordance with 1.2.2 herein.

COLUMBUS, OHIO 43218-3990		G	5

3.3 <u>Electrical performance characteristics</u>. Unless otherwise specified herein, the electrical performance characteristics are as specified in table I and shall apply over the full case operating temperature range.

3.4 <u>Electrical test requirements</u>. The electrical test requirements shall be the subgroups specified in table II. The electrical tests for each subgroup are described in table I.

3.5 <u>Marking</u>. Marking shall be in accordance with MIL-PRF-38535, appendix A. The part shall be marked with the PIN listed in 1.2 herein. In addition, the manufacturer's PIN may also be marked.

3.5.1 <u>Certification/compliance mark</u>. The compliance mark for device class M shall be a "C" as required in MIL-PRF-38535, Appendix A. For Class Q product built in accordance with A.3.2.2 of MIL-PRF-38535 or other alternative approved by the Qualifying Activity, the "QD" certification mark shall be used in place of the "QML" or "Q" certification mark.

3.6 <u>Certificate of compliance</u>. A certificate of compliance shall be required from a manufacturer in order to be listed as an approved source of supply in MIL-HDBK-103 (see 6.6 herein). The certificate of compliance submitted to DLA Land and Maritime-VA prior to listing as an approved source of supply shall affirm that the manufacturer's product meets the requirements of MIL-PRF-38535, appendix A and the requirements herein.

3.7 <u>Certificate of conformance</u>. A certificate of conformance as required in MIL-PRF-38535, appendix A shall be provided with each lot of microcircuits delivered to this drawing.

3.8 <u>Notification of change</u>. Notification of change to DLA Land and Maritime-VA shall be required for any change that affects this drawing.

3.9 <u>Verification and review</u>. DLA Land and Maritime, DLA Land and Maritime's agent and the acquiring activity retain the option to review the manufacturer's facility and applicable required documentation. Offshore documentation shall be made available onshore at the option of the reviewer.

3.10 <u>Processing EPROMS</u>. All testing requirements and quality assurance provisions herein shall be satisfied by the manufacturer prior to delivery.

3.10.1 <u>Erasure of EPROMS</u>. When specified, devices shall be erased in accordance with the procedures and characteristics specified by the manufacturer.

3.10.2 <u>Programmability of EPROMS</u>. When specified, devices shall be programmed to the specified pattern using the procedures and characteristics specified by the manufacturer.

3.10.3 <u>Verification of erasure of programmability of EPROMS</u>. When specified, devices shall be verified as either programmed to the specified pattern or erased. As a minimum, verification shall consist of performing a functional test (subgroup 7) to verify that all bits are in the proper state. Any bit that does not verify to be in the proper state shall constitute a device failure, and shall be removed from the lot.

3.13 <u>Data retention</u>. A data retention stress test shall be completed as part of the vendor's reliability monitors. This test shall be done for initial characterization and after any design or process change which may affect data retention. The methods and procedures may be vendor specific, but shall guarantee the number of years listed in section 1.3 herein over the full military temperature range. The vendor's procedure shall be kept under document control and shall be made available upon request of the acquiring or preparing activity, along with test data.

4. VERIFICATION

4.1 Sampling and inspection. Sampling and inspection procedures shall be in accordance with MIL-PRF-38535, appendix A.

4.2 <u>Screening</u>. Screening shall be in accordance with method 5004 of MIL-STD-883, and shall be conducted on all devices prior to quality conformance inspection. The following additional criteria shall apply:

- a. Burn-in test (method 1015 of MIL-STD-883).
  - (1) Test condition C or D. The test circuit shall be maintained by the manufacturer under document revision level control and shall be made available to the preparing or procuring activity upon request. The test circuit shall specify the inputs, outputs, biases, and power dissipation, as applicable, in accordance with the intent specified in method 1015 of MIL-STD-883.
  - (2)  $T_A = +125^{\circ}C$ , minimum.
- b. Interim and final electrical test parameters shall be as specified in table II herein, except interim electrical parameter tests prior to burn-in are optional at the discretion of the manufacturer.

# TABLE II. Electrical test requirements. 1/2/

MIL-STD-883 test requirements	Subgroups (in accordance with MIL-STD-883, method 5005, table I)
Interim electrical parameters (method 5004)	
Final electrical test parameters (method 5004)	1*, 2, 3, 7*, 8, 9, 10, 11
Group A test requirements (method 5005)	1, 2, 3, 4, 7, 8A, 8B, 9, 10, 11
Groups C and D end-point electrical parameters (method 5005)	2, 8A, 10

\* PDA applies to subgroups 1 and 7. Any or all subgroups may be combined when using a high speed tester.

- 1/ Subgroups 7 and 8 shall consist of verifying the pattern specified.
- 2/ For all electrical tests, the device shall be programmed to the pattern specified in 4.3.1(d).

4.3 <u>Quality conformance inspection</u>. Quality conformance inspection shall be in accordance with method 5005 of MIL-STD-883 including groups A, B, C, and D inspections. The following additional criteria shall apply.

- 4.3.1 Group A inspection.
  - a. Tests shall be as specified in table II herein.
  - b. Subgroups 5 and 6 in table I, method 5005 of MIL-STD-883 shall be omitted.
  - c. Subgroup 4 (C<sub>IN</sub> and C<sub>OUT</sub> measurements) shall be measured only for initial qualification and after any process or design changes which may affect input or output capacitance. Capacitance shall be measured between the designated terminal and GND at a frequency of 1 MHz. Sample size is 15 devices with no failures and all input and output terminals tested.
  - d. All devices selected for testing shall be programmed with a checkerboard pattern or equivalent. After completion of all testing, the devices shall be erased and verified, (except devices submitted for groups C and D testing).
  - e. Subgroup 7 and 8 shall include verification of the pattern specified in 4.3.1(d).

### 4.3.2 Groups C and D inspections.

- a. End-point electrical parameters shall be as specified in table II herein.
- b. Steady-state life test conditions, method 1005 of MIL-STD-883.
- (1) Test condition C or D. The test circuit shall be maintained by the manufacturer under document revision level control and shall be made available to the preparing or procuring activity upon request. The test circuit shall specify the inputs, outputs, biases, and power dissipation, as applicable, in accordance with the intent specified in method 1005 of MIL-STD-883.
- (2)  $T_A = +125^{\circ}C$ , minimum.
- (3) Test duration: 1,000 hours, except as permitted by method 1005 of MIL-STD-883
- (4) All devices selected for testing shall be programmed with a checkerboard pattern or equivalent. After completion of all testing, the devices shall be erased and verified.

## 5. PACKAGING

5.1 <u>Packaging requirements</u>. The requirements for packaging shall be in accordance with MIL-PRF-38535, appendix A.

6. NOTES

6.1 <u>Intended use</u>. Microcircuits conforming to this drawing are intended for use for government microcircuit applications (original equipment), design applications, and logistics purposes.

6.2 <u>Replaceability</u>. Microcircuits covered by this drawing will replace the same generic device covered by a contractor-prepared specification or drawing.

6.3 <u>Configuration control of SMD's</u>. All proposed changes to existing SMD's will be coordinated with the users of record for the individual documents. This coordination will be accomplished using DD Form 1692, Engineering Change Proposal.

6.4 <u>Record of users</u>. Military and industrial users should inform DLA Land and Maritime when a system application requires configuration control and which SMD's are applicable to that system. DLA Land and Maritime will maintain a record of users and this list will be used for coordination and distribution of changes to the drawings. Users of drawings covering microelectronic devices (FSC 5962) should contact DLA Land and Maritime-VA, telephone (614) 692-8108.

6.5 <u>Comments</u>. Comments on this drawing should be directed to DLA Land and Maritime-VA, Columbus, Ohio 43218-3990, or telephone 614-692-0540.

6.6 <u>Approved sources of supply</u>. Approved sources of supply are listed in MIL-HDBK-103 and QML-38535. The vendors listed in MIL-HDBK-103 and QML-38535 (Only if QML.) have agreed to this drawing and a certificate of compliance (see 3.6 herein) has been submitted to and accepted by DLA Land and Maritime-VA.

### STANDARD MICROCIRCUIT DRAWING BULLETIN

### DATE: 17-12-06

Approved sources of supply for SMD 85102 are listed below for immediate acquisition information only and shall be added to MIL-HDBK-103 and QML-38535 during the next revision. MIL-HDBK-103 and QML-38535 will be revised to include the addition or deletion of sources. The vendors listed below have agreed to this drawing and a certificate of compliance has been submitted to and accepted by DLA Land and Maritime-VA. This information bulletin is superseded by the next dated revisions of MIL-HDBK-103 and QML-38535. DLA Land and Maritime maintains an online database of all current sources of supply at <a href="https://landandmaritimeapps.dla.mil/programs/smcr/">https://landandmaritimeapps.dla.mil/programs/smcr/</a>.
