

## Product Change Notice

Date:	September 20, 2019
Overview:	The housing for Wxx200-H compact fans is being modified to integrate mounting points / holes for ease of use and mounting with capacitors
Reason for Change:	For W2E200-H (115V AC) fans requiring larger size capacitors, it was difficult to attach the capacitors with the original housing style; this led to reworking of the housing and sometimes required additional mounting brackets. The new mounting points / holes allow larger capacitors to be mounted to the housing without complex attachment methods.
Affected Part No(s):	All PN's beginning with W1G200-H, W2E200-H, and W3G200-H in cast aluminum  Note: Even though the DC and EC versions don't have capacitors, the common housing will incorporate these mounting points for the benefit of the AC versions.
Design Change Detail:	Integration of mounting points / holes into the housing for Wxx200-H compact fans
Effective Date:	Running change to be completed by the end of 2019
Last Time Buy Deadline:	N/A
Pricing:	No change
