

Date: January 14, 2021
To: Bussmann series military fuse and fuse holder customers
Subject: Update on stop shipment notification for select products

Dear valued customer:

The Bussmann™ series products listed on the following pages have been on a stop shipment per the directive of the DLA dated on August 16, 2019. We are in the process of testing to release the stop shipment but, like with many things, we suffered delays in 2020.

Our goal was to release the stop shipment before the end of December 2020, but we missed that goal. Our new target is to resume production on all parts listed in the table below by the end of the second quarter of 2021, with sporadic releases from now until then.

Two of the greatest impacts on this delay are (1) disruptions in our supply chain that lead to the need to validate new vendors for components and (2) limited testing bandwidth both internally and externally. To address both issues, we have added additional engineering support and are evaluating additional laboratories for testing.

We realize this delay is causing issues for many of you and your scheduled projects. It is for this reason we have chosen to not wait for completion of the full program but rather, will be submitting PNs to the DLA as the testing is successfully completed.

For further assistance in selecting a commercial equivalent product, please contact FuseTech@Eaton.com, or your local Bussmann series product sales representative.

Kind regards,

AJ Johnson
Product Manager
