Heatsinks f.cool

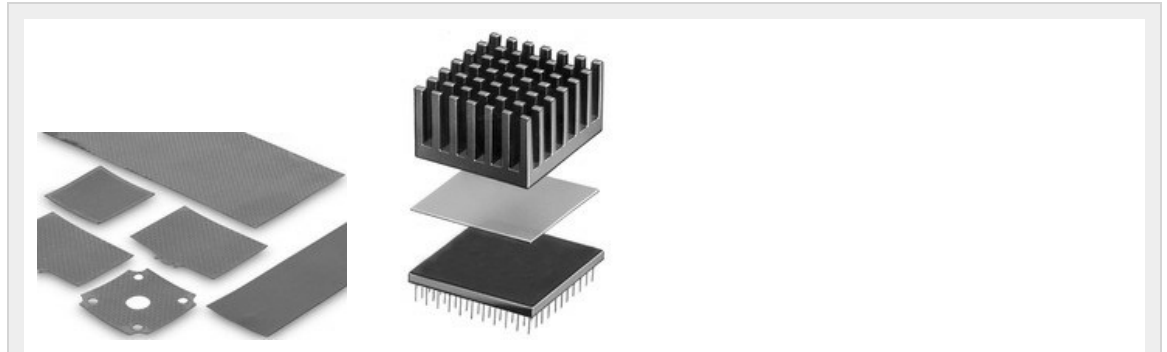

- ▶ Profile heatsinks and fluid coolers
- ▶ Heatsinks and active heatsinks for processors
- ▶ Board Level heatsinks
- ▶ Cooling aggregates
- ▼ Accessories for electronic components
  - ▼ Thermally conductive material
    - Silicone rubber insulating material for semiconductors
    - Thermally conductive foil made of siliconelastomer
    - Silicone-free thermal conductive foils
    - High thermoconducting graphite foils
    - Thermal conductive foil one-sided adhesive
    - **Thermally conductive foil both sides adhesive**
    - Heat conductive foam and gel foils
    - Kapton insulator washers
    - Aluminium oxide wafers
    - Mica wafers
    - Thermal transfer compound and thermal interface film
    - Thermally conductive adhesive
  - ▶ Fixing material for mechanical components
  - ▶ Mounting material for single semiconductors and heatsinks
- ▶ Cases f.case
- ▶ Connectors f.con

Thermally conductive foil both sides adhesive

WLFT 404 ...

WLF ... 14 x 14

isolations, double sided adhesive

Features	Accessories / related products
<b>dimensions</b>	14x14 mm
<b>type of delivery</b>	cut
<b>description</b>	insulating, double sided adhesive
<b>name of foil</b>	WLF
<b>Folienart</b>	T 404
