Product:	Minitek IDC Receptacle		Part Numbers Concerned:	See attached list
Product Manager:	Dieter Rensch		Issue Date:	23 February 2007
			Page(s):	1/1
Distribution:	Active and Contract Customers			
<p>Subject: Product Change and Product Discontinuance</p> <p>Nature of Change: In order to increase performance and capacity, FCI has redesigned the mould for the standard Minitek IDC Receptacle. The new mould has been designed for optimum plastic flow and reduced cycle times. With that some minor changes will influence the appearance of the product, but will be with no effect on the application and function. The most striking differences are the removal of the slots at both ends of the product and the holes in the cover.</p> <p>The versions from 6 to 30 position will be available in all three options: standard (option "1"), with polarization key (option "3") and with bumps for friction latch retention (option "7").</p> <p>The versions from 34 to 50 positions will be available in standard version (version "1") and with polarization key (version "3"), but will be discontinued with bumps for friction latch retention (version "7"). The large number of contacts for those versions gives a very high retention without additional bump. This concerns only the following 12 out of 120 active part numbers.</p> <p>Implementation Date: The new mould will be used for all orders after April 1, 2007 This applies to 108 part numbers (see attached list).</p> <p>All obsolete part numbers can be ordered till April 1, 2007 Last distributor stock returns: April 1, 2007 Last shipment date: June 1, 2007 This applies to 12 part numbers (see attached Discontinuance list).</p> <p>Affected Part Numbers: See attached list</p> <p>For questions regarding this PCN contact: Dieter Rensch Product Manager Ph: +33 3 81545414 Dieter.rensch@fciconnect.com Or contact your nearest FCI representative</p>
