Product:	Metral® High-Speed Connectors	Part Numbers Concerned:	See attached list
Product Manager:	Jeff O'Brien	Issue Date:	13 March 07
		Page(s):	1/1
Distribution:	GLOBAL		

Subject:

Metral® High-Speed Headers and Receptacles will move to performance based plating.

Nature of Change:

With the continual escalation of gold and other precious metals, FCI will move to performance based plating while continuing to meet the Telcordia GR-1217-Core specification. This important strategic move, gives FCI the option to supply Metral® High-Speed products with either gold plating, or FCI's GXT™ palladium nickel alloy with a gold flash cap. The end result allows FCI to maintain competitive pricing on Metral® High-Speed connectors with no change in performance.

FCI customer drawings will be updated to reflect performance based plating rather than specific plating type. FCI developed GXT™ in the 1980's and has used the plating on many connector families for over 25 years. Both gold and GXT™ plating variations have been fully tested to the Telcordia requirements. Test report **EL-2007-01-012A** is available upon request.

Implementation Date:

May 14, 2007

Distribution:

No returns will be accepted due this announcement

Affected Part Numbers:

See attached list for affected part numbers

Alternative Products:

N/A – Gold or GXT™ plated parts maybe used interchangeably

Action Required:

Sales personnel are requested to contact their respective customers and notify them of this change. There is no customer action required. Part numbers will not change as either plating type meets the Telcordia specifications
