Product Manager:	HIRAN NAMBOOTHIRI			
Subject:	Process Change Notification			
Distribution:	Global			
Type of Change:	Manufacturing Process Change			
Change Description:	FCI is now introducing Palladium Nickel Alloy with Gold Flash(GXT), as additional Plating Material for Smartcard Connectors series. FCI had developed GXT plating in the 1980's and have used this plating on numerous other connector families over the past three decades. Consequent to this FCI will have the flexibility to offer both types of plating against the same specification. This will have no impact on the performance of the connector and their would be no change in the FCI part numbers			
Reason for Change:	Provide additional plating option			
Affected Parts:	List attached.
