Type of Change:	Manufacturing Process Change		
Change Description:	FCI has been offering gold plated Millipacs receptacle connectors complying with Telcordia CO and IEC performance levels. FCI is now introducing Palladium-Nickel with Gold Flash plating (GXT) as additional plating material for the Millipacs Receptacle series connectors. Millipacs with GXT plating has been tested against Telcordia CO and IEC performance levels. FCI will now have the flexibility of offering both the type (Gold or GXT) of plating material against the same specification. To strengthen the competitive position, FCI will switch to GXT option as preferred plating system for Millipacs Receptacle connectors.		
Reason for Change:	Standardization of performance specification according to Telcordia GR-1217-CORE performance level 5 (CO) and IEC performance levels using Gold or Palladium Nickel alloy over gold flash (GXT) as plating materials in the contact area.
