# Shielded Small Waterproof Connector

Bayonet

Waterproof

Compact

# Features

## 1. Small, Robust Design

Small, robust design with metal shell

Dimensions Example  
(LF10 Plug Mated with Front Mount Receptacle)

## 2. Bayonet Lock

User-friendly lock with superior vibration resistance.

Lock Design

## 3. Waterproof : IP67/IP68\* Compliant

IP67/IP68 waterproof performance when mated.

\*IP67 : Left at a water depth of 1 meters for 30 minutes in mated condition.

IP68 : Left at a water depth of 2 meters for 14 days in mated condition.

## 4. Easy Shielding Termination

The cable shield is easily connected to the connector shell by attaching the metal clamp to the cable sheath.

Shield Connection Phase Diagram

## 5. Easy Assembly

Waterproof performance and shielding of the plug are attained just by tightening the ring. The plug design reduces component and assembly costs.

## 6. Wide Variety of Configurations

- 2 types of cable assembly: solder and crimp
- Hybrid type with power and signal contacts in a single shell for space-saving
- Plug with easy to grip sleeve that prevents slipping for enhanced operability
- 2 receptacle mounting options: front mount and rear mount

## 7. High Speed Transmission

Supports Cat.5e(1Gbps) high speed Ethernet

\*Based on EtoE Standard Class D 3-Conn E3

\*Characteristics depend on pin assignment, cable specifications and cable assembly conditions. Please check prior to use.

\*Please contact a Hirose representative for questions on the recommended pin assignment.

## 8. Suited for Long-Term Outdoor Use

Sunshine weather meter test performed for 2,000 hours.

## 9. Safety Standard Certified

The 4 position variation meets TÜV safety standards at a current of 10A.

The 3 position and 4 position variations also meet UL safety standards.

## 10. RoHS2 Compliant

## Panel Cut-Out Dimensions

Unit : mm

Type	Shell Size	Applicable Connector	$\phi A$	B	Panel Thickness
Front Mount	LF07	LF07WBR-##	9.05	8.1	0.7 to 2.0
	LF10	LF10WBR-##	11.05	10.2	
	LF13	LF13WBR-##	14.05	13.1	
Rear Mount	LF07	LF07WBRB-##	11.05	10.5	0.7 to 4.0
	LF10	LF10WBRB-##	14.05	13.1	0.7 to 2.0
	LF13	LF13WBRB-##	17.05	16.1	0.7 to 4.8

Note : The applicable alphanumeric is added in place of ## based on the pin count. (Example: 6S)

## Contact Arrangement and Main Specifications

Note 1 : The cable specifications in the above table satisfy UL requirements.

Note 2 : Use a cable without empty space inside. If there is empty space in the cable, clamping and waterproof performance may not be maintained.

## Connector Usage Precautions

- When assembling the connector and installing to equipment, refer to the separate procedure manual and drawings. Please also make sure to use the specified tightening torque. If the torque is too low or high, it may result in loosening or product damage. (Contact a Hirose sales representative for the procedure manual.)
- Once mated, pull lightly on the cable to confirm the mated status and that the connector does not come off.
- Excessive external force applied to the connector may cause deformation or damage, resulting in poor conduction or waterproofing performance issues. Please avoid forceful insertion/removal, impact and pulling, routing or twisting of the cables. Also, when routing inside equipment, make sure to provide sufficient slack to the cable so that a load is not applied directly to the connector such as through excessive cable bending or tension on the cable.
- Damage of the waterproof seal or waterproof surface may result in issues with the waterproof performance, so please refrain from using a damaged product.

## While Taking into Consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please confirm the Drawing and Product Specifications sheets.

Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non-specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose, assurance will not be given.

If considering usage for below mentioned applications, please contact your sales representative.

In cases where the application will demand a high level of reliability, such as automotive, medical instruments, public infrastructure, aerospace/ defense etc. Hirose must review before assurance of reliability can be given.
