Honeywell Sensing & IoT announcement – products not recommended for new design

April 16th, 2018

Honeywell

THE POWER OF CONNEC

As we continue to expand our sensor portfolio with new products, Honeywell Sensing and Internet of Things (SIoT) is also actively managing the existing product lines with consideration to their product lifecycle. Some of our older lines have entered the sunset phase of their product lifecycle. While Honeywell intends to support existing business for sunset products into the foreseeable future, these parts are not recommended for new designs.

A current list of sunset products has been posted to our pricing portal; this is not an end-of-life notice for these products, however. Honeywell intends to support existing business into the foreseeable future. We encourage you to update your systems and product databases accordingly.

This update is the result of feedback gathered from our channel partners on various ways to improve our price book process. We have been very pleased with the many suggestions that we have received and we look forward to implementing more of these suggestions in the following months.
