Reviews

3M™ Hot Melt Applicator PG II/PG II LT Extension Tip 9946 is a brass extension tip for 3M™ Hot Melt Applicator PG II/PG II LT. We constructed this brass tip to feature a better sight line. The design of this hot melt applicator extension tip allows for maximum control during application and reduces initial surge.

Good Sight Line and Reduced Initial Surge

Featuring control and a good sight line, 3M™ Hot Melt Applicator PG II/PG II LT Extension Tip 9946 is a brass extension tip with a 0.072 inch bore. This applicator tip is designed for 3M™ Hot Melt Applicator PG II/PG II LT. We engineered this applicator extension tip to offer, at a decreased flow rate, reduced initial surge and maximum control of all the 3M™ Hot Melt Adhesives. In addition to these features, this hot melt extension tip can be applied and replaced easily.

Recommended Applications

3M™ Hot Melt Applicator PG II/PG II LT Extension Tip 9946 can be used across many industries for a variety of applications, including:

- Assembly
- Attaching
- Securing
- Repairing
- Potting
- Panel bonding
- Bundling
- Sealing
- Foam bonding
- Packaging

Maximum Control for Optimum Results

The features of this brass extension tip include maximum control and reduced initial surge, making 3M™ Hot Melt Applicator PG II/PG II LT Extension Tip 9946 a great solution for many of your hot melt applications. For more control and a good sight line, enjoy the excellent results that come from our effective extension tip design.

The brass extension tip (9946) will allow for maximum control of all the 3M Scotch-Weld Hot Melt LM Adhesives and substantially reduce initial surge
