Circuit Configuration:

Notes:

- It is recommended that a 0.01 µF bypass capacitor be connected between Vcc (Pin 4) and Ground (Pin 2) to minimize power supply noise.
- It is recommended that an external 0.01 μF AC-coupling capacitor be connected to output (Pin 3) of the device.
- For the TCXO (I587) Pin 1 should not be left floating but must be connected to ground.
