CERTIFICATE OF REACH COMPLIANCE

Dear Customer:

In response to your inquiry regarding ITT's Interconnect Solutions compliance to the European Union Regulation ((EC No. 1907/2006) concerning the Registration, Evaluation and Authorisation of Chemicals, (REACH), please be advised of the following:

Awareness and Focus: ITT is fully aware of the European REACH regulation and has allocated resources to deal with all legislative requirements and business continuity concerns related to REACH.

Registration of Substances: Since our products are not intended to release any substance under normal and reasonably foreseeable conditions of use we are exempt from any registering requirements with the European Chemical Agency (ECHA). Article 3 para 3 of the REACH regulation defines an article as "an object which during production is given a special shape, surface or design which determines its function to a greater degree than its chemical composition". A substance on its own, in a mixture or in an article, for which Annex XVII contains a restriction shall not be manufactured, placed on the market or used unless it complies with the conditions of that restriction (see Article 67 para 1 REACH). We declare that our articles do comply with these requirements.

However, although ITT is principally a supplier of articles which do not require registration, we have begun, and will continue, to contact our suppliers of "substances, preparations and articles" to ensure that all necessary pre-registration, registration and notification requirements are being complied with in the required timeline. This effort extends to all materials used by ITT that are within the scope of REACH and with regards to application in which the materials are used in our products.

Notification & Substances of Very High Concern (SVHCs): According to Article 33 REACH (Duty to communicate information on substances in articles) we will notify our customer in the case that any of the REACH Candidate List SVHC is present above 0.1% (weight by weight) in articles that we supply. According to our current knowledge, the articles you have inquired about and its packaging material does not contain any of the substances published in the latest candidate list (<http://echa.europa.eu/candidate-list-table>) in concentrations above 0.1 % weight by weight or produce more than 1 ton per year. See attachment for more specific. Rest assured, if any SVHC is identified in any of our products above the threshold, ITT will communicate to our customers sufficient information to allow for the safe use of the article and the naming of the substance.

Sincerely,

Compliance Team
