ITT Cannon Product Change Notification and Enhancements

Trident Neptune and Trident Neptune Metal Dust Caps

Dear Valued Customer:

ITT Cannon GmbH ("ITT") is issuing this product change and product enhancement notification for receptacle dust caps used on ITT's Trident Neptune (TN) and Trident Neptune Metal (TNM) Series.

To expand our capabilities and better service our global customers, ITT is adding the following dust caps (inlets) part numbers to our portfolio:

- 192900-0393 for use on Trident Neptune (TN) size 16 receptacles – Grey
- 192900-0394 for use on Trident Neptune Metal (TNM) size 14 receptacles – Black

Furthermore, to ensure proper use with the appropriate Trident Series, ITT is transitioning all Trident Neptune dust caps, which include current part numbers 192900-0378 (size 14 shell) and 192900-0383 (size 24 shell), to a grey inlet color. Trident Neptune Metal (TNM) dust caps will remain black.

On page two, you will find a table summarizing our Trident Series dust caps – part numbers, colors and correlating shell sizes for each series.

Any current stocked inventory does not need to be replaced or returned. ITT will implement these design changes within Q4 2020.

If you are not the end customer, we ask that you inform the end customers. Should you require further information or assistance, please do not hesitate to contact your local ITT Sales or Customer Service Representative. For any technical questions, please contact Kai Rainer Klein at kai-rainer.klein@itt.com or Nadja Heckenberger at Nadja.Heckenberger@itt.com.

Sincerely,
ITT Cannon GmbH

ITT Cannon Trident Series Dust Cap Chart:

Type		Size
