ITT Cannon Product Notification
Raw Material Shortage Affecting Trident Series - Update

Dear Valued Customer,

As a follow-on to our October 14, 2021 letter regarding the raw material shortages of yellow phosphorus affecting our Trident Series products, ITT Cannon GmbH ("ITT") is issuing this Product Change Notification ("PCN") to inform you that ITT has qualified an alternative plastic material for use in our Trident Neptune Series Products. Effective as of 15 days from the date of this PCN, ITT will start using the new qualified raw material in the production of the Trident Neptune Series Products.

For all standard "catalog" part numbers, we will not be able to provide piece part approval process documentation, but First Article Inspection ("FAI") documents and other test reports will be available upon request.

Lastly, we are in the process of adding this alternative plastic material to our Trident UL Entry. Once completed, this will become a second sourced material for all additional Trident Series derivatives including:

- Trident Neptune Metal (TNM)
- Trident Ringlock (TR)
- Trident Snap Together (TST)

Please note that the new qualified plastic material will not alter the form, fit or function of the Trident Neptune Series Products or any of the Trident Series derivatives listed above. Furthermore, given continued market shortages on raw materials, the qualification of this alternative plastic material will help reduce ITT's risk of production delays.

If you have any questions regarding this matter, please do not hesitate to contact your local ITT Sales or Customer Service Representative.

Sincerely,
ITT Cannon GmbH
