

Update to Orion Fan Model OD6025 Series

Please be advised, there has been a frame design change to do tooling failure on the Orion OD6025 series of DC fans.

At the time of the tooling update, the motor was resubmitted to UL, resulting in a decrease in the max current rating.

The recent changes did require wire leads to be routed differently due to the new tooling which in some case may affect installation. However, the changes do not affect its form, function or any product certifications. Orion Fans information and data is subject to change without prior notification.

All Orion DC Fans are designed to meet UL, cUL, TUV, VDE and CE standards.
