### Description

Littelfuse low cost glass encapsulated thermistors are manufactured using super stable NTC chips which are hermetically sealed in a glass (DO-41 diode style) package. The result is a device which exhibits excellent long term reliability and stability even when subjected to severe environmental or thermal conditions. Their uniform dimensions and axial lead configuration make them especially suitable for use with automatic insertion equipment.

### Options

- Non-standard resistance values and tolerances
- Point matched at specified temperatures

#### **Features**

- High temperature capability to +300°C
- Hermetically sealed glass package
- Low cost
- . High voltage insulation
- **Part Numbering System**

Note: Not all combinations of Part Number codes are available. Contact Littelfuse for details.

. Tape and Reel

Packaging

- Excellent long-term stability
- Tinned CSS Lead
  Wires are Solderable
  or Weldable
