Features:

- Two, three, or four downstream USB 3.0 ports (which also support USB 2.0)
- Three additional USB 2.0 ports for non-removable devices (USB5537B only)
- Designed for low-power operation and low thermal dissipation
- On-chip 8051 µC manages GPIOs, VBUS, and other hub signals
- Configuration via on-chip programmable ROM, SPI ROM or SMBus
- Manufacturing line and field update capabilities
