Appearance & Shape

 The NFZ series is an impedance component designed for the radiation noise ranges from 30 to 150MHz.
With high impedance generated in small package, this product can suppress noise element connecting to noise conduction route in series.
Moreover, with wide line up corresponding to various frequency range, optimum product can be selected according to the model or set.

- 2. The nickel barrier structure of the external electrodes provides excellent solder heat resistance.
- 3. NFZ series low DC Resistance.Large Current in a small. The Rated Current is the maximum 2.9A.
- 4. Corresponds to 125 °C maximum use temperature.
