Production Discontinuation Notice **φ20 and φ22 Radial Lead Type of Aluminum Electrolytic Capacitors**

To whom it may concern:

Thank you for using our products. We feel sorry to inform you that production of our Aluminum Electrolytic Capacitors, φ20 and φ22 Radial Lead Type, will be discontinued. Sincerely, we would like to apologize for any convenience that might cause. Your understanding and cooperation are deeply gratitude.

1. Products to be affected

Size: Φ20 and Φ22

Relevant series: SMH, KMH, SMG, KMG, SMQ, KMQ and other related customized products

2. Background for production discontinuation

All our radial lead type products of φ20 and φ22, characteristic of special equipment in production with special specifications, have been deleted from the 2015/2016 Edition Catalogue because of their decreasing demand with the progress of miniaturization and high performance of high CV products. As we could not secure stable supply of such products due to small production quantity of several thousand pieces per month, aging of equipment and difficulty in securing materials, we decided to put the production to an end.

3. Schedule

Timing for production discontinuation: upon your approval

The last order date: December 27, 2019

The last shipping date: March 31, 2020

※ For individual products and other inquiries, please don't hesitate to contact our salesman.

We would like to ask you to review the attached Acknowledgement Form and return a signed acknowledgement up to March 29, 2019 to our sales divisions.

Sincerely yours,

Kaname TAKAHASHI
