BSL-7	no successor	
BSL-8	no successor	
BSL-9	no successor	

Notes:

1. The replacement products are form, fit, and function compatible to the discontinued products. Therefore, they are fully compatible to all existing NEUTRIK speakON receptacles, adapters and couplers.
2. The replacement products bring a host of improvements including:
 - Up to 37 A RMS current rating
 - IEC 61984, UL 1977 and CSA C22.2 No.182.3 certifications, thus accepted as components of equipment according to various standards (e.g., IEC 62368-1)
 - Ergonomic design with slip-proof, two-compound molded housing for improved handling and aesthetics
 - Locking bushing to protect against unintended opening
 - Faster and smoother assembly due to a strain relief that snaps into the insert
 - Improved cable kink protection due to two-component rear bushing
 - Green color coding for 4-pole speakON; brown color coding for 2-pole speakON
 - Unique Neutrik locking bushing and strain relief for a wide range of cable outer diameters. For 4-pole speakON connectors, choose either the “-S” or “-L” variant based on cable outer diameter (“-S” for cable OD 6-12 mm; “-L” for cable OD 10-16 mm).
