

Change of ink material for Noise Filters

Dear Valued Customer,

We hereby would like to inform you of the changes of ink material for Noise Filter in order to meet China VOC standards. It is applicable to the ink for the following parts.

1. Noise Filter Parts in question

Please refer to the attached a list

2. What changes made

A: Ink that is used for Okaya film condenser such as X class condenser [Cx] and Y class condenser [Cy]

B: Ink that is used for Lot number

The new ink material for B shall be supplied by the same manufacturer as Okaya currently deal with.

3. When to change

VOC qualified ink will be used for those two types of parts in questions and/or laser ink will be used for the parts for the production from April 1st, 2021. Those produced parts will be replaced with the current parts when the stocks are run out.

Product feature and/or characteristics will remain unchanged due to the printing material change.

Thank you for your continuing patronage, and we are looking forward to serving you even better in the future.

Sincerely

Akira Takayashiki
Director, General Manager Sales Headquarters
