

Accuris has added the following environmental document to the active parts as mentioned in the document from Onsemi as of 10-June-2022.

Thank You.

Compliance with REACH

REACH (**R**egistration, **E**valuation, **A**uthorization and **R**estriction of **C**hemical substances) is an European Community Regulation on chemicals and their safe use (EC 1907/2006). The regulation entered into force on June 1st 2007.

onsemi supports the basic aim of REACH in improving the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances. **onsemi** meets all applicable REACH requirements and is committed to provide our customers with information about substances in its products as required.

Under REACH, registration provision is applicable to manufacture or import of chemicals and does not apply to onsemi's EU semiconductor manufacturing operations. It is anticipated that substances used in electronic products will be registered by raw material manufacturers within the supply chain.

onsemi products are "articles" as defined in REACH Article 3(3) and do not release substances under their normal use. Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if those are present above a concentration limit of 0.1 % on an article level.

onsemi products do not contain the Substances of Very High Concern, included in the Candidate List of substances of very high concern, issued by European Chemical Agency (ECHA), last updated on 10th June 2022, with exception of Lead, which may be contained in some products (please see note **below Table1).

Candidate List of Substances of Very High Concern (SVHC)

Note :

*Diboron trioxide was added to REACH as a Substance of Very High Concern (SVHC) on June 18, 2012. **onsemi** products in glass encapsulated packages may list Diboron trioxide as a constituent material in the glass encapsulation, in a concentration greater than 0.1%; REACH classifies; glass as a substance of unknown or variable composition, complex reaction products or biological matter (UVCB) containing the elements silica, calcium, sodium, potassium, magnesium and other cautions bonded together with oxygen. In glass, these elements are bonded into a non-crystalline molecular structure with completely different properties than the starting material; Therefore Diboron trioxide is not present in the finished **onsemi** product and does not require notification of the presence of a SVHC

Lead, which was added to a Candidate List of Substance of Very High Concern (SVHC) on June 27th, 2018, may be contained in some of **onsemi products. In such cases the lead is RoHS exempted with 7a (lead in high melting temperature type die attach solders) or 7c (lead in glass or ceramic). If present, lead is listed in a material declaration.

onsemi products do not contain any of the Substances included in the Authorization List, issued by European Chemical Agency (ECHA).
