

Current Limit Switch, with OVP and TRCB, 28 V / 5 A Rated

FPF2895C

Description

The FPF2895C features a 28 V and 5 A rated current limit power switch, which offers Over-Current Protection (OCP), Over-Voltage Protection (OVP), and True Reverse Current Block (TRCB) to protect system. It has low On-resistance of typical 27 mΩ with WL-CSP can operate over an input voltage range of 4 V to 22 V.

The FPF2895C supports $\pm 10\%$ of current limit accuracy, flexible operations such as selectable OVP, selectable ON polarity and selectable OCP behavior, which can be optimized according to system requirements.

The FPF2895C is available in a 24-bump, 1.67 mm x 2.60 mm Wafer-Level Chip-Scale Package (WLCSP) with 0.4 mm pitch.

Setting Current Limit

FPF2895C current limit is set with an external resistor connected between I_{SET} and GND. This resistor is selected using the following equation:

$$R_{SET} (k\Omega) = 4448.6 / I_{lim} [mA]$$

Resistor tolerance of 1% or less is recommended.
