

ON Semiconductor

CERTIFICATE OF COMPLIANCE- RoHS Declaration

RoHS Compliance

ON Semiconductor hereby certifies that the "G" suffixed ON Semiconductor part numbers are in compliance with the European Union Directive, 2002/95/EC on the Restriction of the use of certain Hazardous Substances in electrical and electronic equipment (RoHS).

Some of our Pb-free parts were released to market prior to the conversion of our part number nomenclature to include a G suffix. These parts are called intrinsically Pb-free. Their part numbers are being changed to include the G suffix as well. These parts are also compliant with the RoHS directive.

The Pb contained in the non-G suffixed products is present for metallurgical bonding purposes. These products do not contain any of the other five hazardous materials (mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB, polybrominated biphenyl ethers (PBDE)) above the allowable RoHS limits.

We realize that some customers are not yet ready to make this change and may require additional time for conversion. We will manage these situations as an exception and work with our customers to enable a smooth transition.

ON Semiconductor is committed to meeting the needs of our customers as they transition to RoHS compliance.
