*The following Phoenix Contact products have been modified. Existing specifications will be met or exceeded. Please review and acknowledge this document and inform your personnel as needed.*

### Description of Change:

Different PCB terminal blocks and headers will be delivered in larger packaging units as of July 2013.

Within our environment management system we are certified according to ISO 14001. With the change of the packaging size, we take into account the idea of environmental protection to save resources, and furthermore, significantly reduce the packaging volume for our customers and partners.

The change concerns 2- to 5-pos. headers and 6- to 10-pos. headers. In the future, 2- to 5-pos. headers will be sold in packs of 250 units and 6- to 10-pos. headers in packs of 100 units.

In general, the same rules apply to the PCB terminal block product families covered by this PCN. However a few exceptions exist due to the size and shape of the terminal blocks. Thus, some 2- to 5-pos. terminal blocks have new package quantities other than 250 units.

The new cardboard boxes will furthermore be marked with a colored label ("changed packaging").

The technical data of the PCB terminal blocks and headers will not be changed.

During the conversion phase, both packaging units will be delivered simultaneously depending on the stock. The new Minimum Order Quantities will apply but the fulfillment of these quantities may be done using earlier packaging/quantities to reach these new MOQ levels.
