Change of housing design for PT terminal blocks

Within the framework of continuous product improvements, the housing design for the PT 2,5-TWIN and PT 2,5-QUATTRO terminal blocks was changed. This change is only visible when looking at the uncovered lateral side of the terminal blocks. The housing contour remains unchanged. The changes are not visible either when looking at the terminal blocks from above. The technical data, operation, approvals or accessories of the terminal blocks remain unchanged. It is possible to use old and new terminal blocks in any combination.

Below figure shows the changes using the example of a PT 2,5-TWIN terminal block.

Expected initial delivery of the changed product(s)

As of middle of September 2018
