

## Product Change Notification

### PCN-IF-3122-2019

Business Unit	Product Line Code	Type of Change	Action	Date of Issue
IF - Interface Components	CK1	Product Change Notification	Notify Distributors and Field	2/22/2019

*The following Phoenix Contact products have been modified. Existing specifications will be met or exceeded. Please review and acknowledge this document and inform your personnel as needed.*

#### Description for Product Change Notification

The products contained within this notification will be changing from their current base color of green to gray (RAL 7042). As Phoenix Contact continually innovates and delivers new products to the market, we find the need to create a consistent visual identity of our Control Cabinet products. This change will allow for a more aesthetically consistent look across Phoenix Contact's portfolio of products from relays to signal conditioners, power supplies, surge suppression, and more.

This change is purely cosmetic in nature and does not impact the form, fit, function, or technical ratings of any product involved in this change. To be clear form, fit, and function will remain the same.

During the transition phase we will ship all green product first, followed by the new gray color. This transition will take place at varying rates by part number due to demand and inventory in the supply chain. Being that both colors are technically sound and function the same, Phoenix Contact will not be accepting returns for color preference.

Additionally, terminal blocks used within the MACX series products will transition to light gray color (RAL 7035) However, terminal blocks with application-specific coloring (ex. Blue for EX) will remain as they are today.

Lastly, the Relay family of products will now have both the fully assembled, and individual component part numbers added to the printing on the side of the product. Each terminal will maintain the current labeling scheme to enable quick identification of proper wiring in the field.

The color change can be noticed on the product's packaging by reviewing the "V/C" label. This "V/C" label will be revised to the subsequent number and can be identified on the included document.

#### Stock Status

Can existing stock still be used?      Yes

Is mixture of stock acceptable?      No

#### Transaction Dates

Date modification goes into effect from Germany:      4/1/2019

Expected first shipment (from Phoenix Contact) of the modified products(s):      4/30/2019

## How to identify Green or Gray

1. Locate label on outside of package
2. Observe the “V/C” identifier to the right of the Qty, alphanumeric description, and part number (circled in red)
3. Match the listed “V/C” number to the table in attached Excel sheet to uncover if the box contains green or gray parts.

**Double click on Excel logo** below to view the spreadsheet with V/C identified:
