Background

The DIN rail types covered in this product change notification are currently supplied under one part number, but in two different packaging sizes.

- 50 m/25 pcs.
- 10 m/5 pcs.

This leads to unnecessary delays in the delivery performance of the articles. Because of this, these articles will be offered in clearly defined packaging units in future. To realise this, it is necessary to proceed 2 different types of changes which are explained in detail on the following slides. After the change, the mentioned articles are available in the following packaging sizes:

- 50 m/25 pcs.
- **20 m/10 pcs.**

The changes will be implemented by 01.01.2022
