

Product change notification (PCN)

Title / short description	Minor visual change to the knurled nut in the area of the edge and chamfer
Affected article category	Connector
Change category	Form and appearance
Change number	CAB250013-00
Reason for PCN/PDN Revision	

Purpose/objective of the change

As part of the continuous improvement process, it is necessary to regularly evaluate the product portfolio down to the component level and adapt it to the product lifecycle. For this purpose, individual part tools are continuously monitored and regularly revised to ensure technical and economic efficiency and to maintain delivery capability. In this context, it is necessary to adjust the production process for the mentioned articles and to relocate the tool parting line of the mold halves. This purely optical change has no impact on the technical or functional properties and is visible as a continuous line around the part depending on the light incidence.

Detailed description of the change
