Magnetics PBG Manufacturing Footprint Optimization

Dear Team,

As part of the Chilisin integration into Pulse, the total magnetics manufacturing footprint is being optimized to improve efficiency, and fully leverage synergies and scale. The goal is to complete all the manufacturing location changes by mid-2022. No process, material or form, fit and function changes will be made. Each customer will be individually notified and provided with part number level detail so that the required sample validation and other qualifications can be coordinated before new location shipments start.

This will be a team effort between the PBUs and our sales team to ensure a seamless transition for all customers.

Thank you for your support and understanding.

William Malherbe

Executive Vice President

Magnetics PBG Head, YAGEO Group
