

Wireless External Dual Band Antenna for 2.4 GHz & 5.0 GHz Applications

Pulse Part Number W1043
Pulse Part Number W1044

The W1043 series offers superior transmission and reception between wireless access points and devices on a WLAN (Wireless Local Area Network). Wireless networks, especially those that are indoors, often have physical barriers which inhibit communication between wireless devices. These barriers cause blind spots, intermittent signal quality and interference. Selecting the correct external antenna can improve the range and reliability of wireless networks.

W1043 antennas offers an economical solution for OEMs of wireless devices. These antennas are compatible with IEEE 802.11a/b/g/n, Bluetooth® and ZigBee™ applications, as well as other 2.4 GHz and 5 GHz ISM frequency band uses. This dual-band antenna covers the 2.4 GHz and 5.0 GHz frequencies plus 5.15 GHz and 5.85 GHz.

Features

- Dual band, blade style antenna
- Omni directional radiation pattern provides broad 360° coverage
- RF efficient PCB radiator design
- RoHS Compliant Product

Applications

- WLAN devices using WiFi (802.11a/b/g), Bluetooth and ZigBee
- In-building wireless access points (AP)
- Replacements for wireless routers
- Spatial Diversity AP configurations

Electrical Specifications

Frequency 1 [MHz]		2400 - 2500
Frequency 2 [MHz]		4900 - 5825
Nominal Impedance [Ω]		50
VSWR	Freq 1	2:1
	Freq 2	2:1
Gain	Freq 1 [dBi avg]	2
	Freq 2 [dBi avg]	4
Radiation Pattern		Omni
Polarization		Linear Vertical
Power Rating [W]		

Environmental Specifications

Operating Temperature [°C]	-30 to +75
Storage Temperature [°C]	-30 to +85

Mechanical Specifications

Radome Material	PBT/PC+ABS
Color	Black*
Weight [oz/g]	.64 / 18.21
Dimensions [in/mm]	6.2 / 157.5

This document covers all product variants of the following product family

Product	Connector	Remark
W1043	RP-SMA Male	Same antenna but with different connector
W1044	SMA Male	

Wireless External Dual Band Antenna for 2.4 GHz & 5.0 GHz Applications

Pulse Part Number W1043

Pulse Part Number W1044

Application Notes:

Omn-directional antennas provide a uniform, donut-shaped, 360° radiation pattern. The omni-directional pattern is suitable for point-to-multipoint broadcasting in all directions. This antenna is primarily used for WLAN applications. However, it can also be used for a variety of other applications within the specified frequency range. When used as an access point, the antenna is ideally located at the center of the coverage area.

Radiation Patterns

NOTE: Tested in bent (articulated) position.
