

Affected Products – Rxx-B series

Dear customers and distributors, we herewith inform you about Product Change Notice concerning the following products:

Rxx-B series (all versions).

As the converter output is power limited rather than current limited, we have decided to update the datasheet and labels for this series. For example, the R05-100B can deliver up to 50mA under certain conditions and is not limited to 25mA as stated in the existing datasheet.

There is no change to the internal construction or actual performance of the converters. Customers already using these converters can continue to use them without any change to their applications. The updated datasheet will be uploaded onto our website.

This PCN is issued because the appearance (label) of the converter will change after Datecode 1938 (see attachment)

Article #	Part Number
81000002	R12-100B
81000006	R24-100B
81000003	R05-100B
81000005	R15-100B
81000007	R12-150B
81000009	R24-150B
81000008	R15-150B

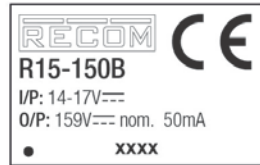

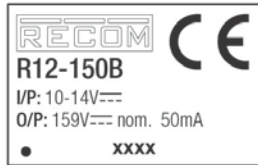

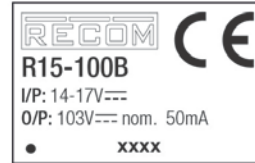

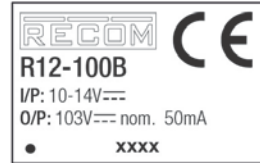

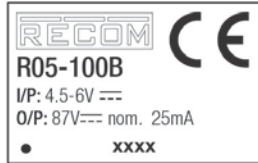

Issue Date: 05 Aug 2019
Effective: Datecode 1938
