Dear Channel Partner –

In an effort to fulfill the evolving demands of a Global market, SCHURTER, Inc. would like to notify our channel partners that the SCHURTER Group has consolidated and transferred the Connectors business unit to SCHURTER Electronics India (SEI). SEI will now hold the title of Competence Center: Connectors.

As a result of this change in responsibilities, some of the connector products, which were being produced in China, will transfer to SCHURTER Electronics India next year. While not a driving factor behind the transfer, but an added benefit for the US market will be that these items will no longer be potential target for import tariffs.

We will handle the production transfer in two phases. First phase will start March 1st, 2019, second phase, June 1st, 2019. An official Product Change Notice (PCN) will follow the successful completion of the transfer and recertification.

An unfortunate element with any production transfer is the subsequent production shut down. We anticipate this to be between 3-4 months. During this time, we also anticipate increased transit times, so are operating under the premise that the supply channel should expect a 6 month disruption on the effected part numbers. The attached Excel file provides a list of SCHURTER part numbers involved in this transfer.

We strongly recommend that you review this list and place your stocking orders before our end of year closure, Dec 21st, 2018. Stocking orders may be scheduled up to 12 months past your order date.

Please contact me with any questions.

Thank you

Nathan Widger
Vice President, Inside Sales & Supply Chain
